MONOTUBE CARTRIDGE KIT FOR FAT BOB

Progressive Suspension – Monotube Cartridge Kit for Fat Bob

True high performance front suspension is finally available for the 2008+ HD Fat Bob models (FXDF). Progressive Suspension has gone back to the drawing board and created a state of the art Fork Cartridge Kit designed to outperform everything on the market. Our new asymmetrical design places a preload adjuster over a progressive rate spring in one leg and an aluminum bodied, sealed cartridge damper on the other. The result is superior damping and ride control combined with tunable preload and a new benchmark for high performance suspension on the Dyna platform. Can be installed in either configuration, Standard or 1" low. Available for 2008-2015 Dyna applications.
