

FLHTCUL

Progressive Suspension – Fork Spring Kits for Harley-Davidson FLHTCUL & FLHTKL Touring Ultra Low Models

We've got new Progressive Rate Fork Spring Kits for the Harley-Davidson FLHTCUL & FLHTKL Touring Ultra Low Models. It's a simple application expansion, nothing new as it is the same style Fork Spring Kit we've been doing for a while now. These are specifically designed to work with the Ultra Limited (FLHTKL) and Electra Glide Ultra (FLHTCUL). The Fork Spring Kits soak up the small road bumps, yet are firm enough to absorb the molar-rattling ones. Spring rates have been chosen to reduce front end "dive" during braking, yet still provide excellent ride comfort. Better yet, we warranty our fork springs for life! Progressive Rate Fork Springs have several advantages over straight rate springs. A Progressive Rate Spring has the advantage of a rising rate resistance to compression. The benefit of this is that the spring can be soft enough at the start of the travel to offer a "plush" ride, yet be firm enough at the end of the travel to soak up the big bumps.
